- JavaScript | JQuery | ReactJS | Angular
- NodeJS | Express | TypeScript
- PHP | Laravel | CodeIgniter
- MySQL | MongoDB

Moderate

- Python | Django
- Java | Spring Boot
- Swift
- Firebase

PROJECTS

Landing Page <https://github.com/MarwanMDev/Landing-Page-Project> Sep 2022

- Developed a dynamic responsive single-page website using HTML, CSS, and JavaScript including features such as hiding the navbar & the scroll-top button when not scrolling.
- Ensure it was in a clear design, functionality, and project structure with no errors displayed in the console.

Weather Journal App <https://github.com/MarwanMDev/Weather-Journal-App> Sep 2022

- Built up a web app using NodeJS, Express, HTML, CSS, and JavaScript that uses OpenWeatherMap API and user data to dynamically update the UI.
- Reduced the size of the code and increased its readability by using JavaScript method chaining.

Movies App <https://github.com/MarwanMDev/movies-tv-shows> Oct 2022

- Established a web app using Ionic Angular that integrates with TMDB's API (The movie database) to fetch movie, TV show, or actor images and/or data.
- Achieved a responsive layout that is usable across modern browsers, tablets, and mobile phones.

EXPERIENCE

Ancillary Revenue Manager

EGYPTAIR, Cairo, EGYPT

July 2021 – Present

- Launching new ancillary products on EGYPTAIR website, such as a bidding system for upgrading travel tickets using Amadeus web services, which boosted the revenue by 50% for Q1 2022/2023.
- Joining the development committee for revamping EGYPTAIR website.

Executive Assistant to GM Sales

EGYPTAIR, Cairo, EGYPT

August 2019 – June 2021

- Implemented a new payment method that increased sales traffic by 4% in the Egyptian market.
- Collaborated with cross-functional stakeholders to implement NDC (New Distribution Capability) launched by IATA for the development and market adoption of a new, XML-based data transmission standard.
